Professional Summary

Final-year Computer Science Engineering student at VIT Bhopal (CGPA 9.01/10). Built and deployed three full-stack applications end-to-end across Flask and Node.js, shipped an applied ML/NLP model to production, and contributed merged pull requests to open-source repositories – independently, start to finish.

Education

VIT Bhopal University, Bhopal, Madhya Pradesh

Bachelor of Technology in Computer Science and Engineering

Tagore Academy, Faridabad, Haryana

Class XII – PCM

Tagore Academy, Faridabad, Haryana

Class X

July 2023 – May 2027

CGPA: **9.01/10**

March 2023

Percentage: **89%**

March 2021

Percentage: **97.4%**

Technical Skills

- **Programming Languages:** C++, Python
- **Core CS Subjects:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Web & Backend:** HTML, CSS, JavaScript, Flask, Node.js, Express.js, REST APIs, Authentication & Session Management
- **Machine Learning & NLP:** scikit-learn, Pandas, NumPy, Retrieval-Augmented Generation (RAG), LLM APIs
- **Databases:** MySQL, SQLite, PostgreSQL
- **Tools & Platforms:** Git, GitHub, VS Code, Render

Projects

StudyNest – AI-Powered PDF Learning Assistant

- *Flask, SQLite, RAG, LLM APIs, pypdf, Tailwind CSS, Python* | [GitHub](#) | [Live Demo](#)
- Architected a 14-page Flask application converting uploaded PDFs into AI-generated quizzes, flashcards, and structured notes via a provider-agnostic LLM pipeline (Anthropic, OpenAI, Gemini).
- Built a retrieval-augmented tutor that chunks source documents and retrieves the most relevant passages per question, grounding answers in the uploaded material.
- Designed 5 quiz formats with an adaptive revision engine that re-targets topics scoring below 60% accuracy, plus a gamification layer – XP, streaks, and 6 unlockable badges.

TrustSeal – NLP-Based Job Fraud Detection

- *Flask, scikit-learn, Bag-of-Words / CountVectorizer, Python* | [GitHub](#) | [Live Demo](#)
- Trained and benchmarked 5 classifiers (Naive Bayes, Logistic Regression, LinearSVC, Decision Tree, Random Forest) on a class-balanced set of 1,732 EMSCAD job postings.
- Selected Random Forest for deployment at 90% accuracy and F1-score, the best of all models tested.
- Built a Bag-of-Words feature pipeline with **CountVectorizer** feeding the classifier to return confidence-scored, real-time fraud predictions with three-tier risk classification.
- Shipped a Flask web interface with a real-time input-completion tracker and preloaded sample postings for instant model testing.

PlateMind – Smart Nutrition & Recipe Recommendation App

- *Node.js, Express, bcrypt, Session-Based Auth, HTML/CSS/JavaScript* | [GitHub](#) | [Live Demo](#)
- Built a Node.js/Express authentication layer with bcrypt-hashed passwords and httpOnly, production-secured session cookies gating app access.
- Engineered a transparent recipe-scoring engine ranking meals by pantry-ingredient overlap, dietary fit, and calorie/protein proximity, with allergen-exclusion rules and “leftover rescue” suggestions.
- Developed 7 interactive pages – dashboard, pantry tracker, planner, and grocery list – with a one-click Render Blueprint deployment keeping user accounts durable across restarts.

Certifications

- **Marketing Analytics** – NPTEL, Gold Medal (2026)
- **Introduction to Machine Learning** – NPTEL, Silver Medal (2025)
- **Intro to Machine Learning** – Kaggle (2025)
- **The Bits and Bytes of Computer Networking** – Google (2025)

Leadership & Extracurricular Activities

- Core Member, Event Management Team, Microsoft Club | **Sports:** Badminton, Table Tennis, Swimming
- **Hackathon Participant** – Flipkart GRiD 8.0; Honeywell Technologies Campus Connect Hackathon
